

Household Cyber Safety Quick Start

Simple actions a family can start today to reduce malware and scam risk.

Audience	Families, caregivers, older adults, teens, and community helpers.
Purpose	Give the household a clear first path before deeper technical guidance.
Best use	Use this first when a family asks where to begin.

Start with these actions

[]	Protect email first because it resets many other accounts.
[]	Use a long unique password for email, banking, and phone carrier accounts.
[]	Turn on multifactor authentication for email, banking, social media, and cloud accounts.
[]	Turn on automatic updates for phones, computers, browsers, and apps.
[]	Do not click links in surprise bank, package, prize, or support messages.
[]	Ask a trusted person before sending money, codes, passwords, or gift cards.

Family rule

If a message creates fear, pressure, or secrecy, pause before acting. Real support should allow calm verification.

Next step

Open the baseline checklist and the stop verify report playbook. They turn this quick start into a repeatable home routine.

Keep this guide near the device or account it protects. Small habits make a real difference when they are repeated.
