

Fraud Prevention Quick Start

By: Joseph Gonzalez

Best For	People who want fast protection against common fraud
Use	Pick one item today and one tomorrow. Small steps add up.
Inside	Phone number protection, bank alerts, privacy review, and family rules.

For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.

Fraud Prevention Quick Start

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

Start here

Fraud prevention works best when your family slows down, verifies requests, and protects the accounts criminals try to use for resets.

- Add a carrier PIN to protect your phone number.
- Turn on purchase alerts for bank and credit cards.
- Check privacy settings on social media.
- Remove old public information when possible.
- Create a family rule for gift cards, codes, and money requests.

Español

La prevención de fraude funciona mejor cuando la familia baja la velocidad, verifica pedidos y protege las cuentas usadas para recuperar acceso.

- Añade un PIN con tu compañía móvil.
- Activa alertas de compras en banco y tarjetas.
- Revisa privacidad en redes sociales.
- Elimina información pública vieja cuando sea posible.
- Crea una regla familiar para tarjetas de regalo, códigos y pedidos de dinero.

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
