

Privacy and Online Presence

By: Joseph Gonzalez

Best For	Families who want to share less and reduce scam targeting
Use	Review social media, old profiles, search results, and location settings.
Inside	Public information, privacy settings, location history, and account recovery risks.

For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.

Privacy and Online Presence

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

Why privacy matters

Privacy is not hiding. It is choosing what is shared, who sees it, and how much information strangers can use against you.

Check public information

- Search your name and phone number.
- Remove old public profiles you no longer use.
- Review birthday, address, school, employer, and family details.
- Limit who can see your friends list and photos.

Settings to review

- Social media privacy.
- Location sharing.
- Ad and data settings.
- Old apps with account access.
- Recovery questions that reveal personal details.

Español

Privacidad no significa esconderse. Significa decidir qué se comparte, quién lo ve y cuánta información pueden usar desconocidos.

- Busca tu nombre y teléfono.
- Elimina perfiles viejos que no usas.
- Revisa cumpleaños, dirección, escuela, trabajo y detalles familiares.
- Limita quién puede ver fotos y lista de amistades.
- Revisa ubicación y aplicaciones antiguas.

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
