

30 Day Home Cyber Improvement Plan

By: Joseph Gonzalez

Best For	Families who want simple weekly progress
Use	Do one or two items each week. Keep it calm and realistic.
Inside	A month long plan for accounts, devices, Wi Fi, backups, and family practice.

For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.

30 Day Home Cyber Improvement Plan

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

How to use this plan

The goal is progress, not perfection. Each week focuses on one area. Fifteen minutes at a time is enough.

Week 1: protect accounts

- Secure email with two step verification.
- Choose a password manager or another safe password method.
- Change three reused passwords.
- Write down where recovery codes are stored.

Week 2: clean up devices

- Turn on automatic updates.
- Update browsers and remove unused extensions.
- Remove apps no one uses.
- Run a built in security scan.

Week 3: improve the home network

- Review router settings.
- Change the router admin password.
- Use guest Wi Fi for visitors.
- Write down the trusted support number for your internet provider.

Week 4: practice and recover

- Back up important files.
- Practice Stop, Check, Ask with one fake message.
- Make a family emergency contact list.
- Review what to do if a device is compromised.

Español

La meta es avanzar, no hacerlo perfecto. Cada semana se enfoca en un área. Quince minutos por sesión es suficiente.

- Semana 1: protege el correo y cambia contraseñas repetidas.
- Semana 2: actualiza dispositivos y elimina aplicaciones que no usas.
- Semana 3: revisa el router y usa Wi Fi de invitados.

- Semana 4: practica con un mensaje falso y guarda una lista de ayuda.

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
