

HOUSEHOLD CYBER SAFETY

Family Cyber Safety Cards

By: Joseph Gonzalez

Best For	Quick conversations with kids, teens, adults, and older adults
Use	Print, cut, or screenshot these cards for family reminders.
Inside	Age friendly safety rules and scripts for everyday situations.

For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.

Family Cyber Safety Cards

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

Kids

- Ask before clicking links or downloading games.
- Do not share your real name, address, school, or passwords online.
- If a message feels scary, show an adult right away.
- In games, ignore free coin or free skin links.

Teens

- Use two step verification on email and social media.
- Watch for fake support messages.
- Do not send private photos to strangers.
- Check privacy and location sharing settings.
- Call a friend if a message from them feels strange.

Adults

- Protect email first.
- Use unique passwords.
- Treat delivery, bank, job, and tech support messages as suspicious until checked.
- Keep devices updated.
- Back up important files.

Older adults

- Do not trust surprise calls about viruses, refunds, locked accounts, or gift cards.
- Do not let anyone control your computer from a surprise call.
- If pressured, hang up and call back using a trusted number.
- Ask a trusted family member to help verify suspicious requests.

Español

Tarjetas rápidas para conversaciones familiares. Imprime, recorta o guarda una captura.

- Niños: pregunta antes de hacer clic o descargar.
- Adolescentes: protege correo y redes con verificación en dos pasos.
- Adultos: protege el correo primero y usa contraseñas únicas.
- Adultos mayores: cuelga si una llamada mete presión y verifica con alguien de confianza.

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
