

Minimum Home Security Checklist

By: Joseph Gonzalez

Best For	A quick household review for parents, caregivers, and older adults
Use	Use this checklist once a month or after setting up a new device.
Inside	Router, accounts, updates, backup, privacy, and family reporting steps.

For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.

Minimum Home Security Checklist

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

What this checklist does

This is the basic safety layer for a normal home. It helps reduce common account theft, scam, and device problems without turning your home into a computer lab.

Router and Wi Fi

- Change the router admin password.
- Use WPA2 or WPA3 security for Wi Fi.
- Turn off WPS if your family does not use it.
- Use guest Wi Fi for visitors.
- Update router firmware or enable automatic updates.

Accounts

- Turn on two step verification for email first.
- Use unique passwords for bank, email, social media, and school accounts.
- Save recovery codes somewhere safe.
- Check account recovery phone numbers and email addresses.

Devices

- Turn on automatic updates.
- Remove apps your family no longer uses.
- Lock each phone, tablet, and computer with a code or biometric login.
- Back up important photos and documents.

Español

Esta es la capa básica de seguridad para un hogar normal. Ayuda a reducir problemas comunes de cuentas, estafas y dispositivos.

- Cambia la contraseña de administrador del router.
- Usa seguridad WPA2 o WPA3 para Wi Fi.
- Activa verificación en dos pasos para el correo primero.
- Usa contraseñas únicas para banco, correo, redes y escuela.
- Activa actualizaciones automáticas.
- Haz copia de seguridad de fotos y documentos importantes.

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
