

Quick Start Guide

By: Joseph Gonzalez

Best For	Families who want a safe first step today
Use	Read first, then pick one action. Save or print for the home.
Inside	Simple household steps for accounts, devices, Wi Fi, and scam messages.

For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.

Quick Start Guide

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

Read this first

Cyber safety at home does not need to be scary. Start with the accounts and devices your family uses every day. Do one small thing at a time.

Start with these five actions

- Protect your email first. It is the key that resets many other accounts.
- Use a long password that you do not use anywhere else.
- Turn on two step verification for email, banking, and social media.
- Turn on automatic updates for phones, computers, browsers, and apps.
- Create one family rule: ask before sending money, codes, passwords, or private photos.

Español

La seguridad en casa no tiene que ser complicada. Empieza con las cuentas y los dispositivos que tu familia usa todos los días. Haz una cosa pequeña a la vez.

- Protege primero tu correo electrónico.
- Usa una contraseña larga que no uses en otra cuenta.
- Activa la verificación en dos pasos para correo, banco y redes sociales.
- Activa actualizaciones automáticas en teléfonos, computadoras, navegadores y aplicaciones.
- Crea una regla familiar: preguntar antes de enviar dinero, códigos, contraseñas o fotos privadas.

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
