

HOUSEHOLD CYBER SAFETY

Household Cyber Safety Toolkit

By: Joseph Gonzalez

Best For	Families who want the complete printable guide
Use	Use one section at a time. Print the checklists that match your home.
Inside	Quick start, baseline checklist, age cards, response plan, and 30 day improvement plan.

For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.

Household Cyber Safety Toolkit

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

Purpose

This toolkit helps a household build practical security habits. It is written for normal people, not just technical adults. Children, teens, parents, caregivers, and older adults each have a role.

Quick start

- Protect email first.
- Use long unique passwords.
- Turn on two step verification.
- Update devices automatically.
- Ask before sending money, codes, passwords, or private photos.

Home baseline

- Change the router admin password.
- Use WPA2 or WPA3 for Wi Fi.
- Use guest Wi Fi for visitors.
- Back up important files.
- Keep recovery numbers and official support links in one safe place.

Family rules

- Nobody gets in trouble for reporting a mistake.
- Children ask before clicking, downloading, or sharing photos.
- Teens protect gaming, school, social, and email accounts.
- Older adults verify urgent calls before sending money.
- Everyone uses Stop, Check, Ask.

Incident response

- Disconnect the affected device.
- Use a clean device for password changes.
- Change email first.
- Contact the bank if money may be involved.
- Take screenshots before deleting messages.
- Report the scam when possible.

30 day plan

- Week 1: secure accounts.

- Week 2: update and clean devices.
- Week 3: review router and Wi Fi.
- Week 4: practice response and backup recovery.

Español

Este kit ayuda a una familia a crear hábitos de seguridad prácticos. Está escrito para personas normales, no solo para adultos técnicos.

- Protege primero el correo.
- Usa contraseñas largas y únicas.
- Activa verificación en dos pasos.
- Actualiza dispositivos automáticamente.
- Pregunta antes de enviar dinero, códigos, contraseñas o fotos privadas.
- Usa Detente, Revisa, Pregunta.

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
