

Family Online Safety Plan

By: Joseph Gonzalez

Best For	Families with children, teens, shared devices, games, and chats
Use	Use during a family conversation or community workshop.
Inside	Rules for chats, games, private photos, app installs, and calm reporting.

For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.

Family Online Safety Plan

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

Family rule

The best safety plan is one people can actually follow. Keep rules simple, repeat them often, and make asking for help normal.

For children

- Ask before downloading games or apps.
- Ask before joining chats.
- Do not share address, school, passwords, or private photos.
- Show a trusted adult if a message feels scary.

For teens

- Protect email, school, gaming, and social accounts.
- Do not reuse passwords.
- Watch for fake support messages.
- Save evidence if someone threatens you.

For parents and caregivers

- Set calm reporting rules.
- Review app permissions together.
- Keep family trusted contacts visible.
- Use parental controls as a support tool, not the only safety plan.

Español

El mejor plan de seguridad es uno que la familia puede seguir. Mantén reglas simples, repítelas y haz normal pedir ayuda.

- Niños: pregunta antes de descargar o entrar a chats.
- Adolescentes: protege correo, escuela, juegos y redes.
- Padres: crea reglas tranquilas para reportar problemas.
- Usa controles parentales como apoyo, no como única solución.

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
