

# Cyber Safety Card for Adults

By: Joseph Gonzalez

|          |                                                                         |
|----------|-------------------------------------------------------------------------|
| Best For | Parents, caregivers, and adult home users                               |
| Use      | Use for family rules and monthly security checkups.                     |
| Inside   | Account protection, device updates, backups, and scam prevention steps. |

*For educational use. Share with family members, caregivers, teachers, and community groups. The goal is calm action, not fear.*

# Cyber Safety Card for Adults

Use this guide as a calm checklist. Read one section, take one action, and come back later for the next step.

## Adult safety card

Adults often manage the accounts that protect the whole home. Start with email, banking, and the devices everyone shares.

- Secure email with two step verification.
- Use unique passwords and a password manager if possible.
- Treat delivery, banking, job, and support messages as suspicious until verified.
- Keep phones, computers, browsers, and routers updated.
- Back up important files and photos.
- Create a calm family rule for reporting mistakes.

## Español

Los adultos suelen manejar las cuentas que protegen el hogar. Empieza con correo, banco y dispositivos compartidos.

- Protege el correo con verificación en dos pasos.
- Usa contraseñas únicas.
- Verifica mensajes de entrega, banco, trabajo y soporte.
- Mantén dispositivos actualizados.
- Haz copia de seguridad.
- Crea una regla familiar tranquila para reportar errores.

---

Reminder: Stop, Check, Ask. If something feels urgent, strange, or scary, slow down and verify with a trusted source.
